VERIFLO DIVISION

Veriflo Division, Parker Hannifin Corporation is a leading manufacturer of precision valves, regulators and surface mount components for the control and application of liquids and gases used in the fabrication of semiconductors, as well as in the chemical and petrochemical industries.

A Leading Manufacturer Of Precision Valves, Regulators & Surface Mount Components

Veriflo Division has maintained industry leadership over the past 95 years through innovative engineering, manufacturing and by placing a premium on quality customer care.

Veriflo maintains two state-of-the-art Class 10 Clean Rooms at its Richmond, CA, facility and has adopted a corporate wide "Lean Manufacturing" philosophy, which is delivering greater value to the customer by eliminating wasteful steps through continuous improvement activities.

Veriflo Division is extremely focused on maintaining the highest of industry standards. The division has achieved an ISO 9001 registration at its Richmond, CA manufacturing plant and its Carson City, NV facility.

This certification confirms Veriflo Division's dedication to quality & excellence as recognized by the international community.

The Instrumentation Group of Parker Hannifin specializes in high quality, critical flow components for world-wide process instrumentation, ultra-high-purity, medical, analytical and biopharmaceutical applications.

Parker's Instrumentation Group has ten manufacturing plants and over 300 authorized distributor locations around the world to provide local inventory and technical support.

Maintained Industry Leadership By Placing A Premium On Quality Customer Care

Valued markets for Parker Hannifin's Instrumentation Group include the following: Chemical Process, Power Generation, Oil and Gas Exploration, Semiconductor Manufacturing, Biomedical, and Analytical Equipment.

Note: For further information on Veriflo Division and or its product line visit the division web site at www.veriflo.com. For more information on Parker Hannifin visit the corporation's web site at www.parker.com.

IR4000 Series

SS High Pressure Regulator Internally Threadless Design

Parker Hannifin Corporation's Veriflo Division presents the IR4000 Series internally threadless pressure regulator for instrument/analyzer and semiconductor applications. The internal threadless design minimizes purge times, and reduces carrier and calibration gas usage. The IR4000's seat materials meet the requirements for corrosive and/or higher temperature media requirements.

Instrument applications include gas management systems in petrochemical/refineries and process analyzer systems. Semiconductor applications include general purpose gas management (Air, Clean Dry Air (CDA), and Plant Nitrogen).

The IR4000 is a high pressure regulator that can be ordered with a variety of options to meet a wide range of system design requirements.

IR4000 Series

Product Features and Benefits

- ▶ Unique patented compression member loads the seal to the body without requiring a threaded nozzle or additional seals to atmosphere.
- ▶ Selection of seat materials for media compatibility and temperature applications.
- ▶ Meets NACE Standard MR0175.
- ▶ O₂ Cleaned.
- ▶ Fully swept design.
- ▶ Internally threadless seat design promotes long seat life.
- ▶ Convuluted, Hastelloy C-22[®] diaphragm provides high corrosion resistance and increases cycle life.
- ▶ Positive upward and downward stops increases cycle life by preventing over stroking of the diaphragm.
- ▶ Low internal volume reduces cycle and purge time.
- ▶ Captured bonnet allows for safety venting.
- ▶ Standard units can be dome loaded (with clean dry air or nitrogen).
- ▶ The use of Inconel[®], Hastelloy C-22[®], and Elgiloy[®] provide superior corrosion resistance and high repeatability.
- ▶ Close tolerances and tight alignment of moving components minimize hysteresis.
- ▶ Unique carrier design disperses gas uniformly through the regulator to improve purging.

IR5000 Series

SS High Pressure Regulator Internally Threadless Design

Parker Hannifin Corporation's Veriflo Division presents the IR5000 Series high pressure regulator. Veriflo Division continues the internally threadless design of the IR4000 family of products.

IR5000 pressure reducing regulator is designed with a larger convoluted diaphragm than the IR4000. This allows for greater sensitivity, and provides precise outlet pressure control.

Instrument applications include gas management for analyzer systems and other industrial processes. Semiconductor applications include general purpose gas management (Air, Clean Dry Air (CDA), and Plant Nitrogen) Systems.

- ▶ Unique patented compression member loads the seal to the body without requiring a threaded nozzle or additional seals to atmosphere.
- ▶ Large diaphragm provides more sensitive pressure adjustments.
- ▶ O₂ Cleaned.
- ▶ Fully swept design.
- ▶ Internally threadless seat design promotes long seat life.
- ▶ Convoluted, Hastelloy C-22® diaphragm provides high corrosion resistance and increases cycle life.
- ▶ Positive upward and downward stops increases cycle life by preventing over stroking of the diaphragm.
- ▶ Low internal volume reduces cycle and purge time.
- ▶ Captured bonnet allows for safety venting.
- ▶ Standard units can be dome loaded (with clean dry air or nitrogen).
- ▶ The use of Inconel®, Hastelloy®, and Elgiloy® provide superior corrosion resistance and high repeatability.
- ▶ Close tolerances and tight alignment of moving components minimize hysteresis.
- ▶ Unique carrier design disperses gas uniformly through the regulator to improve purging.

IR5000W Series

**Welded High Pressure,
Regulator Internally
Threadless Design**

Parker Hannifin Corporation's Veriflo Division presents the IR5000W Series high pressure regulator. Veriflo Division continues the internally threadless design of the IR4000 family of products.

IR5000W pressure reducing regulator is designed with a larger convoluted diaphragm than the IR4000. This allows for greater sensitivity, and provides precise outlet pressure control.

Instrument applications include gas management for analyzer systems and other industrial processes. Semiconductor applications include general purpose gas management (Air, Clean Dry Air (CDA), and Plant Nitrogen) Systems.

 Bushing Nickel Plated Brass
 Stem Handle Tee Nickel Plated Brass

operating conditions

Maximum inlet 5000 psig @ 70°F
 (345 barg @ 21°C)

For oxygen 3000 psig (207 barg)
 Outlet 10-800 psig (.7 - 55 barg) adjustable
 20-1500 psig (1.4 - 103 barg) adjustable
 50-2500 psig (3.4 - 172 barg) adjustable

Temperature -40°F to 165°F (-40°C to 74°C)
 Temp. (Brass) -40°F to 150°F (-40°C to 66°C)

functional performance

Flow capacity $C_v = .02$
 (ANSI/ISA S75.02 1988 using water)

Design Burst Pressure 15,000 psig (1,034 barg)
 Design Proof Pressure 22,500 psig (1,551 barg)

Maximum Inboard Design
 Leak Rate $< 2 \times 10^8$ scc/sec HE

Supply pressure effect 0.5 psig per 100 psig
 (.03 barg per 7 barg)

standard configurations

1/4 inch female pipe threads inlet and outlet
 End to end length 1.88 in. (47.8 mm)

Any combination of FS male and/or female fittings.
 1/4" gland to gland length 1.85 ± .02 in. (47 ± .05 mm)

internal volume

6.5 cc

approximate weight

2.19 lbs. (.993 kg)

Instrumentation

APR66 Series

Pressure Reducing Regulator

Parker Hannifin Corporation's Veriflo Division presents the APR66 Series is a high pressure reducing single-stage regulator designed to operate at inlet pressures up to 6000 psig.

The APR66 offers a full range of pressure sensing without time consuming spring and piston change outs.

features

- ▶ Piston sensing.
- ▶ Thrust bearing allows low actuating torque and precise setability.
- ▶ O₂ Cleaned.
- ▶ Low friction adjusting screw sleeve provides smooth operation.
- ▶ Optional self relieving feature allows user to decrease outlet pressure in closed systems (feature is actuated by turning the adjusting knob counterclockwise).

NOTE: For safety purposes, the optional self-relieving feature is not recommended for toxic or flammable gases or liquids.

materials of construction

Parker Hannifin Corporation's Veriflo Division presents the Quantum 959. The 959 is a high purity, high pressure tied diaphragm regulator.

The 959 regulator controls pressure flows accurately and predictably without changing the liquids or gases and without adding particles or ions to the flowing material.

Subatmospheric pressure control available with the NPR959.

features

- ▶ "VeriClean", Veriflo's low sulfur high purity 316L, Stainless Steel™ enhances electropolishing, welding, and corrosion resistance.
- ▶ Unique patented compression member loads the seal to the body without requiring a threaded nozzle or additional seals to atmosphere.
- ▶ Internally threadless nozzle assembly.
- ▶ Metal-to-metal diaphragm-to-body seal assures high leak integrity.
- ▶ Minimal particle generation and entrapment.
- ▶ High cycle life.
- ▶ 100% Helium leak tested.

ChangeOver System

Continuous Gas & Fluid Management

Parker Hannifin Corporation's Veriflo Division presents the ChangeOver System. The COS is a compact turnkey module designed for continuous gas and fluid management.

The ChangeOver System combines the IR4000 Series pressure reducing regulator with the NOVA Series diaphragm valves to create a compact gas delivery system for continuous gas or fluid applications.

This unique device directs the flow of gas from two separate sources to the user's application. When one source empties, the ChangeOver System automatically draws from the second source. The first source can then be changed without flow interruption.

ChangeOver System

Features

- ▶ Prevents unnecessary downtime by providing continuous uninterrupted gas flow.
- ▶ Convoluted diaphragm provides outlet pressure stability with changes in flow.
- ▶ Integral diaphragm stop provides excellent leak integrity.
- ▶ Valve controlled high pressure purge allows user to clean or purge lines before adding a new cylinder.
- ▶ Quick changeover control enhances safety by minimizing exposure to toxic and flammable media.
- ▶ Designed for easy change of sources while in operation.
- ▶ Separate gauges to monitor both inlet sources.
- ▶ Available in Nickel Plated Brass or 316L Stainless Steel.
- ▶ Alarm sensor port for systems integration allowing user to monitor gas consumption.
- ▶ Optional outlet regulator maintains constant outlet pressure.
- ▶ All Stainless Steel panel and trim design available.
- ▶ Especially suited for continuous on-stream analyzers.

Applications

Specialty Gases

All Specialty Gases used for Process and Purging Applications

Industrial / Analyzer

Refineries

ChangeOver System Annunciator

Audio
& Visual
Indicator

Parker Hannifin Corporation's Veriflo Division presents the ChangeOver System Annunciator. The Annunciator is designed to be used with the ChangeOver System. This gives users both an audible and visual indication of when it is time to change out cylinders. The Annunciator is equipped with four channels to allow for the connection of multiple ChangeOver Systems.

The alarm signal is activated when either cylinder has dropped below a preset pressure. The signal is activated through two pressure switches which are located on each inlet valve of the ChangeOver System.

Parker Hannifin Corporation

About Parker Hannifin Corporation

Parker Hannifin is a leading global motion-control company dedicated to delivering premier customer service. A Fortune 500 corporation listed on the New York Stock Exchange (PH), our components and systems comprise over 1,400 product lines that control motion in some 1,000 industrial and aerospace markets. Parker is the only manufacturer to offer its customers a choice of hydraulic, pneumatic, and electromechanical motion-control solutions. Our Company has the largest distribution network in its field, with over 7,500 distributors serving nearly 400,000 customers worldwide.

Parker's Charter

To be a leading worldwide manufacturer of components and systems for the builders and users of durable goods. More specifically, we will design, market and manufacture products controlling motion, flow and pressure. We will achieve profitable growth through premier customer service.

Product Information

North American customers seeking product information, the location of a nearby distributor, or repair services will receive prompt attention by calling the Parker Product Information Center at our toll-free number: 1-800-C-PARKER (1-800-272-7537). In Europe, call 00800-C-PARKER-H (00800-2727-5374).

The Aerospace Group is a leader in the development, design, manufacture and servicing of control systems and components for aerospace and related high-technology markets, while achieving growth through premier customer service.

The Climate & Industrial Controls Group designs, manufactures and markets system-control and fluid-handling components and systems to refrigeration, air-conditioning and industrial customers worldwide.

The Fluid Connectors Group designs, manufactures and markets rigid and flexible connectors, and associated products used in pneumatic and fluid systems.

The Seal Group designs, manufactures and distributes industrial and commercial sealing devices and related products by providing superior quality and total customer satisfaction.

The Hydraulics Group designs, produces and markets a full spectrum of hydraulic components and systems to builders and users of industrial and mobile machinery and equipment.

The Filtration Group designs, manufactures and markets quality filtration and clarification products, providing customers with the best value, quality, technical support, and global availability.

The Automation Group is a leading supplier of pneumatic and electromechanical components and systems to automation customers worldwide.

The Instrumentation Group is a global leader in the design, manufacture and distribution of high-quality critical flow components for worldwide process instrumentation, ultra-high-purity, medical and analytical applications.
